Study toward
LLMs, world models & cognition.

University at Buffalo · MS Engineering Science, AI and Data Innovation

STUDENT CONTEXT

Completed: EAS 501 · EAS 508 · EAS 510 · CSE 676

Already covered in undergrad: ML · data-intensive computing · computer vision · RL

PROPOSED COURSE DIRECTION / 9 CREDITS

01 CSE 635

Natural Language Processing and Text Mining

LLM foundations · direct fit for language-model research

3 CR · ELECTIVE CANDIDATE

02 CSE 563

Knowledge Representation

Structured knowledge · useful grounding for world-model research

3 CR · ELECTIVE CANDIDATE

03 CSE 575

Introduction to Cognitive Science

Human cognition · connect computational models with minds

3 CR · COGNITIVE-SCIENCE CANDIDATE

BEFORE REGISTRATION

Confirm Spring 2027 sections, prerequisites, degree applicability, and whether prior coursework waives remaining core requirements with the program coordinator. Course meeting times are intentionally omitted until verified.

DEGREE AUDIT FLAG

UB's published AI and Data Innovation plan lists additional core requirements (including probability, machine learning, and data-intensive computing). Your prior coursework may qualify for substitutions or waivers; confirm officially before counting these as complete.
